## EDUCATION

### University of Glasgow

M.S. in Statistics

Related Courses: Bayesian Statistics, Probability, Data Mining and Machine Learning, Time Series

Aug 2024

Degree: B1(Merit)

### Nanjing Audit University

B.E. in Applied Mathematics

Related Courses: Algebra and Analytic Geometry, Mathematical Statistics, Stochastic Processes

Jun 2023

Rank: 18/60

## WORK EXPERIENCE

### Shenzhen University of Advanced Technology (SUAT)

Research Assistant

Nov 2025 – Present

Shenzhen, China

- Study **unified multimodal models** through **training and inference**, investigating whether different modalities are genuinely unified in their representations and reasoning.
- Investigate **recursive self-improvement (RSI)** in **embodied agents**, with an emphasis on automation and iterative learning from environmental feedback.
- Develop advanced post-training frameworks for **vision-language models (VLMs)** and **large language models (LLMs)**, integrating **supervised fine-tuning (SFT)** and **machine unlearning** for targeted knowledge removal.
- Investigate **continual learning** and **federated unlearning** under non-IID data.

### The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen)

Research Assistant, AIRS

Nov 2024 – Nov 2025

Shenzhen, China

- Researched **3D generation**, **video compression**, **image distillation**, and **decentralized federated learning**.
- Curated and released high-quality open-source **3D datasets** through **Hugging Face**; trained large-scale models on **Objaverse** and video benchmarks.
- Managed **6+ servers** and **50+ GPUs** for distributed training; studied **data distillation** and **model compression** for efficient, privacy-aware **LLM/MLLM** development.

### Black Turing AI Limited

AI Research Assistant

Jan 2024 – Nov 2024

Remote

- Prepared TB-scale datasets by web-scraping trending outfit posts from major social media platforms; built datasets for clothing style recognition and style extraction.
- Trained deep learning models for text recognition and style extraction.
- Integrated AI algorithms into fashion workflows to automate outfit recognition and enable style recommendation.

### China Construction Bank, Nanjing Branch

Investment Banking and Financial Markets Department

Jul 2022 – Aug 2022

Nanjing, China

- Aggregated and reviewed financial and sensitive client data (e.g., deposit balances and rating status) for 400+ large enterprises across 10+ industries in the Yangtze River Delta Economic Zone.
- Performed large-scale data analysis using machine learning and statistical models to support investment decision-making.

## PUBLICATIONS

- Dong, C.**, Fung, H., Ye, K., Sun, J., Liu, X., Lau, A. S. M., Yin, G., & Liu, B. (2026). Federated Unlearning via Dual Distillation (**Under review at NeurIPS 2026**; Scores: 5, 4, 4; AC recommendation: Accept).
- Dong, C.**, Sun, J., Fung, H., Xu, H., Li, J., Han, R., Yin, G., & Liu, B. (2026). IF-CMU: Image-Free Class-Level Machine Unlearning for Vision-Language Models.
- Dong, C.**, Fung, H., Ye, K., Sun, J., Wang, C., Han, R., Yin, G., & Liu, B. (2026). CMU: Concept-Level Machine Unlearning for Vision-Language Models (**Under review at AAAI 2027**).
- Peng, Z.\*, **Dong, C.\***, Liu, B., Li, Z., Zeng, K., & Li, J. (2026). S3AD: Efficient Industrial Anomaly Detection via Selection, Space, and Scale (**Pattern Recognition**).
- Liu, X.\*, **Dong, C.\***, Peng, S., & Liu, B. (2026). Byzantine-robust Defense, Detection, and Recovery for Decentralized Federated Learning (**Major revision at IEEE TPAMI**).

## OTHER PUBLICATIONS

---

- Wu, R. \*, Lin, C. \*, **Dong, C.**, Yang, X., & Han, R. (2026). Refining the Appearance and Motion Representations for Multi-view Multi-Human Identification and Tracking (*PRCV*).
- Fung, H., **Dong, C.**, Li, J., Lau, A. S. M., & Yin, G. (2026). TranStyler: Diffusion-Free 3D Texture Stylization via Disentangled Style and UV Supervision (**Under review at AAAI 2027**).
- Fung, H., **Dong, C.**, Yang, A., Xu, H., Chen, Z., & Yin, G. (2026). ORACLE: Finance-Informed Expert Routing and Online Abstention for Cross-Sectional Stock Ranking (**Under review at AAAI 2027**).
- Fung, H., **Dong, C.**, Song, J., Lau, A. S. M., & Yin, G. (2026). ReTok-VC: Variational Token-Level Video Compression with Learned Reuse (**Under review at NeurIPS 2026**).
- Sun, J., Wei, Z., Zou, J., Gong, J., Wang, G., **Dong, C.**, Li, J., & Liu, B. (2026). *Statistical MIA: Rethinking Membership Inference Attack for Reliable Unlearning Auditing*. <https://doi.org/10.48550/arXiv.2602.01150> (**Under review at NeurIPS 2026**; Scores: 6, 4, 4, 4). (\*Equal contribution)

## SCHOLARSHIPS & AWARDS

---

- National Third Prize in National Physics Competition for High School Students *Sep 2018*
- Second Prize (School Level) in Mathematical Modeling *Sep 2020*
- Second Prize (School Level) in the Challenge Cup *Mar 2021*
- Jiangsu Province Winner, Statistical Modeling Cup *Jun 2021*
- Mathematics Department Study Scholarship, Nanjing Audit University *Jun 2023*
- Master's Thesis (Distinction) — Modelling Atmospheric CO<sub>2</sub> Levels with Gaussian Process Regression Models, University of Glasgow *Aug 2024*

## EXTRACURRICULAR ACTIVITIES

---

- Conducted teaching activities at Houdian Primary School, Anhui Province *Jul 2021*
- Participated in social practice supporting left-behind children *May 2022*

## SKILLS/HOBBIES

---

|                              |                                                                             |
|------------------------------|-----------------------------------------------------------------------------|
| <b>Programming Languages</b> | Python, R, MATLAB; proficient with <b>Git</b> for collaborative development |
| <b>Languages</b>             | English (Fluent), Mandarin (Native)                                         |
| <b>Hobbies</b>               | Hiking, Tennis, Badminton                                                   |
